Do not hesitate to forward this email containing useful product news and background information from Fujirebio to your colleagues or partners. For instructions on how to unsubscribe from this newsletter please follow the link at the end of this newsletter.

TESTIMONIAL

TENDIGO™ - from space to earth!

Read the story, as told by the European Space Agency (ESA) and Belgian Verhaert, about how Fujirebio partnered with Verhaert to solve the puzzle of keeping the price of the TENDIGO affordable and yet maintain our strict high quality standards by using smart solutions only applied before in the International Space Station!

BIOMARKER

PIVKA-II: A biomarker of liver cells for the management of hepatocellular carcinoma (HCC)

We have assembled a collection of resources about PIVKA-II, an immature form of prothrombin also known as DCP (Des-gamma-Carboxy Prothrombin), vitamin Kcoagulation factor, synthesized in the liver. In absence of vitamin K or when its action is antagonized (warfarin), PIVKA-II is released into the blood.

BIOMARKER

HBcrAg: A unique marker, a new tool in HBV testing

We have assembled background information about this unique serological marker correlated with cccDNA for improved monitoring of HBV patients under treatment.
